GEOMORPHOLOGY

Contents Volume 23, 1998

Vol. 23, No. 1

Research Papers

Characterising the irregular coastlines of volcanic ocean islands
N.C. Mitchell 1

Mechanisms of loess-sized quartz silt production and their relative effectiveness: laboratory simulations
J. Wright, B. Smith and B. Whalley 15

Linear dune pattern variability in the vicinity of dry valleys in the southwest Kalahari
J.E. Bullard and D.J. Nash 35

Where along a river's length will vegetation most effectively stabilise stream banks?
B. Abernethy and I.D. Rutherfurd 55

Tectonic geomorphology in the Shanxi Graben System, northern China
Y. Li, J. Yang, Z. Xia and D. Mo 77

Striae at St. Mullin's Cave, County Kilkenny, southern Ireland: their origin and chronological significance
A.M. Mc Cabe 91

Vol. 23, Nos. 2–4

Preface 97

Introduction 99

Hydrological influences on the resilience of *Quercus* spp. dominated geoecosystems in central Spain
G. Bergkamp 101

The Mai Maikden sedimentary sequence: a reference point for the environmental evolution of the Highlands of Northern Ethiopia
O. Berakhi, L. Brancaccio, G. Calderoni, M. Coltorti, F. Dramis and M.M. Umer 127

Relative efficiency of three representative matorral species in reducing water erosion at the microscale in a semi-arid climate (Valencia, Spain)
E. Bochet, J.L. Rubio and J. Poesen 139

Water table control on rill initiation and implications for erosional response
R.B. Bryan and D.L. Rockwell 151

Aeolian deposition and its effect on soil and vegetation changes on stabilised desert dunes in northern China
W. Fearnehough, M.A. Fullen, D.J. Mitchell, I.C. Trueman and J. Zhang 171

Salt cave cross-sections and their paleoenvironmental implications
A. Frumkin 183

Field experiments on the transport of rock fragments by animal trampling on scree slopes
G. Govers and J. Poesen 193

Geomorphology and late Holocene climatic change in Northeastern Spain
M. Gutiérrez-Elorza and J.L. Peña-Monné 205

Soil erosion and climate change: the transect approach and the influence of scale
A.C. Imeson and H. Lavee 219

Physicochemical, mineralogical, and geochemical characteristics of lacustrine sediments of the Konya Basin, Turkey, and their significance in relation to climatic change
K. Inoue, M. Saito and T. Naruse 229

Spatial distribution of soil surface coverage on north and south facing hillslopes along a Mediterranean to extreme arid climatic gradient
P. Kutiel, H. Lavee and O. Ackermann 245
The dune systems of the Konya Plain (Turkey): their relation to environmental changes in Central Anatolia during the Late Pleistocene and Holocene
C. Kuzucuoglu, R. Parish and M. Karabiyikoglu 257
Reconstruction of palaeoenvironmental conditions by investigation of Holocene playa sediments in the Ebro Basin, Spain: preliminary results
B. Schütt 273
The relevance of humus forms for land degradation in Mediterranean mountainous areas
J. Sevink, J.M. Verstraten and J. Jongejans 285
Geomorphic response to climatic and environmental changes along a Central Asian transect during the Holocene
L. Starkel 293
Deriving indicators of soil degradation from soil aggregation studies in southeastern Spain and southern France
L.H. Cammeraat and A.C. Imeson 307
Variation of rock fragment cover and size along semiarid hillslopes: a case-study from southeast Spain
J.W. Poesen, B. van Wesemael, K. Bunte and A.S. Benet 323
Differential responses of hillslope and channel elements to rainfall events in a semi-arid area
J. Puigdefabregas, G. del Barrio, M.M. Boer, L. Gutiérrez and A. Solé 337
Fluvio-pedogenic processes in an ephemeral stream channel, Nahal Yael, Southern Negev, Israel
J. Lekach, R. Amit, T. Grodek and A.P. Schick 353
